확장프로그램에서 C/C++ 설치

The screenshot displays the Visual Studio Code interface with the Extensions view open. The search bar at the top of the Extensions panel contains the text "C/C++". The search results list several extensions, with "C/C++" by Microsoft highlighted. The main panel shows the details for the "C/C++" extension, version 1.21.6, published by Microsoft. The extension description is "C/C++ IntelliSense, debugging, and code browsing." The interface includes buttons for "사용 안 함" (Disable), "제거" (Remove), and "자동 업데이트" (Auto Update), along with a settings gear icon. At the bottom, there are links for "Repository", "Issues", "Documentation", and "Code Samples", and a "Live Share" status indicator showing "enabled".

MinGW 설치

MinGW Installation Manager Setup Tool

mingw-get version 0.6.2-beta-20131004-1

Written by Keith Marshall

Copyright © 2009-2013, MinGW.org Project

<http://mingw.org>

This is free software; see the product documentation or source code, for copying and redistribution conditions. There is NO WARRANTY; not even an implied WARRANTY OF MERCHANTABILITY, nor of FITNESS FOR ANY PARTICULAR PURPOSE.

This tool will guide you through the first time setup of the MinGW Installation Manager software (mingw-get) on your computer; additionally, it will offer you the opportunity to install some other common components of the MinGW software distribution.

After first time setup has been completed, you should invoke the MinGW Installation Manager directly, (either the CLI mingw-get.exe variant, or its GUI counterpart, according to your preference), when you wish to add or to remove components, or to upgrade your MinGW software installation.

MinGW 설치

The screenshot shows the MinGW Installation Manager window. The left sidebar has 'Basic Setup' and 'All Packages' options. The main area displays a table of available packages. A context menu is open over the first package, 'An MSYS Installation for MinGW Developers (meta)', with 'Mark for Installation' highlighted by a red rectangle.

Package	Class	Installed Version	Repository Version	Description
An MSYS Installation for MinGW Developers (meta)			2013072300	An MSYS Installation for MinGW Developers (meta)
A Basic MinGW Installation			2013072200	A Basic MinGW Installation
The GNU Ada Compiler			6,3,0-1	The GNU Ada Compiler
The GNU FORTRAN Compiler			6,3,0-1	The GNU FORTRAN Compiler
The GNU C++ Compiler			6,3,0-1	The GNU C++ Compiler
The GNU Objective-C Compiler			6,3,0-1	The GNU Objective-C Compiler
A Basic MSYS Installation (meta)			2013072300	A Basic MSYS Installation (meta)

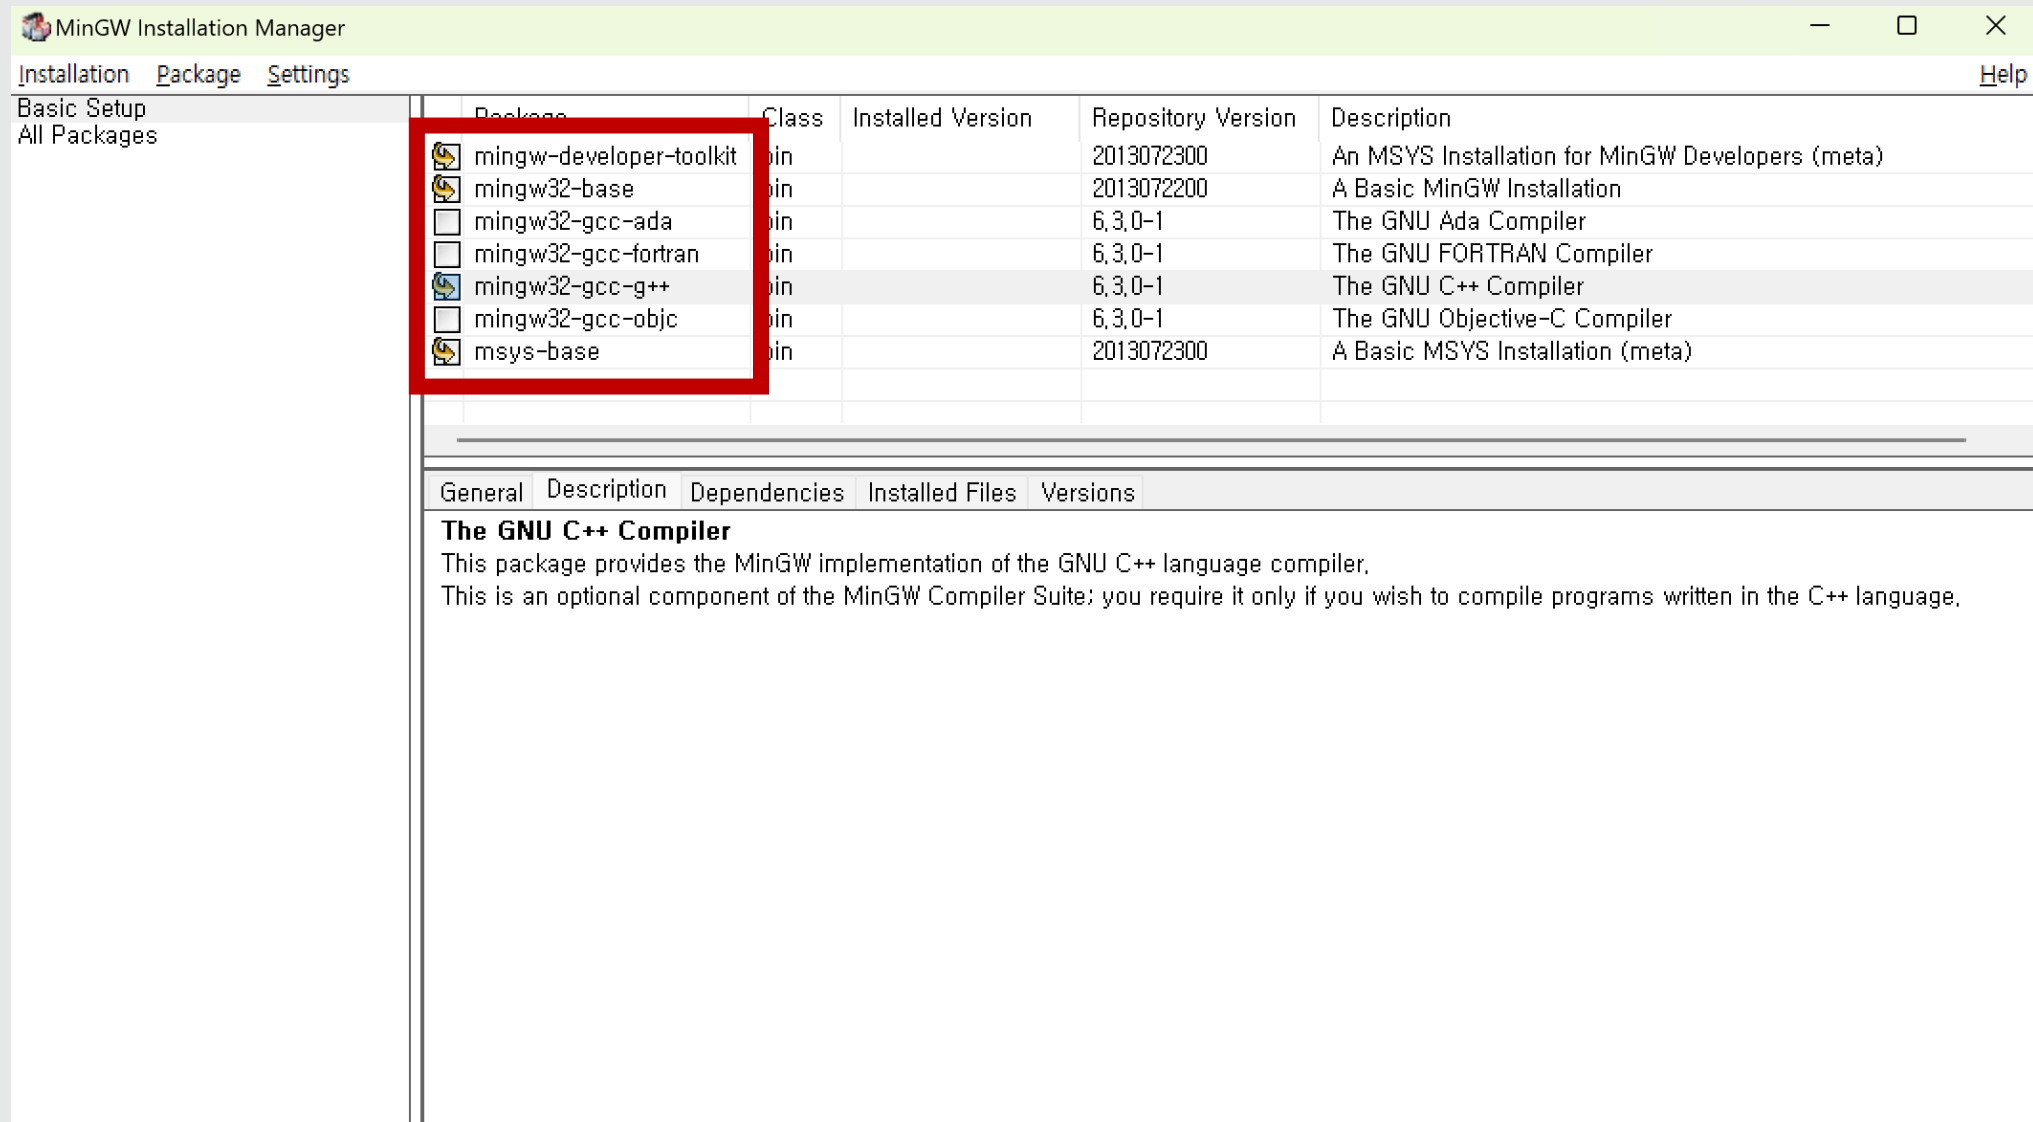

General | Description | Dependencies | Installed Files | Versions

An MSYS Installation for MinGW Developers (meta)

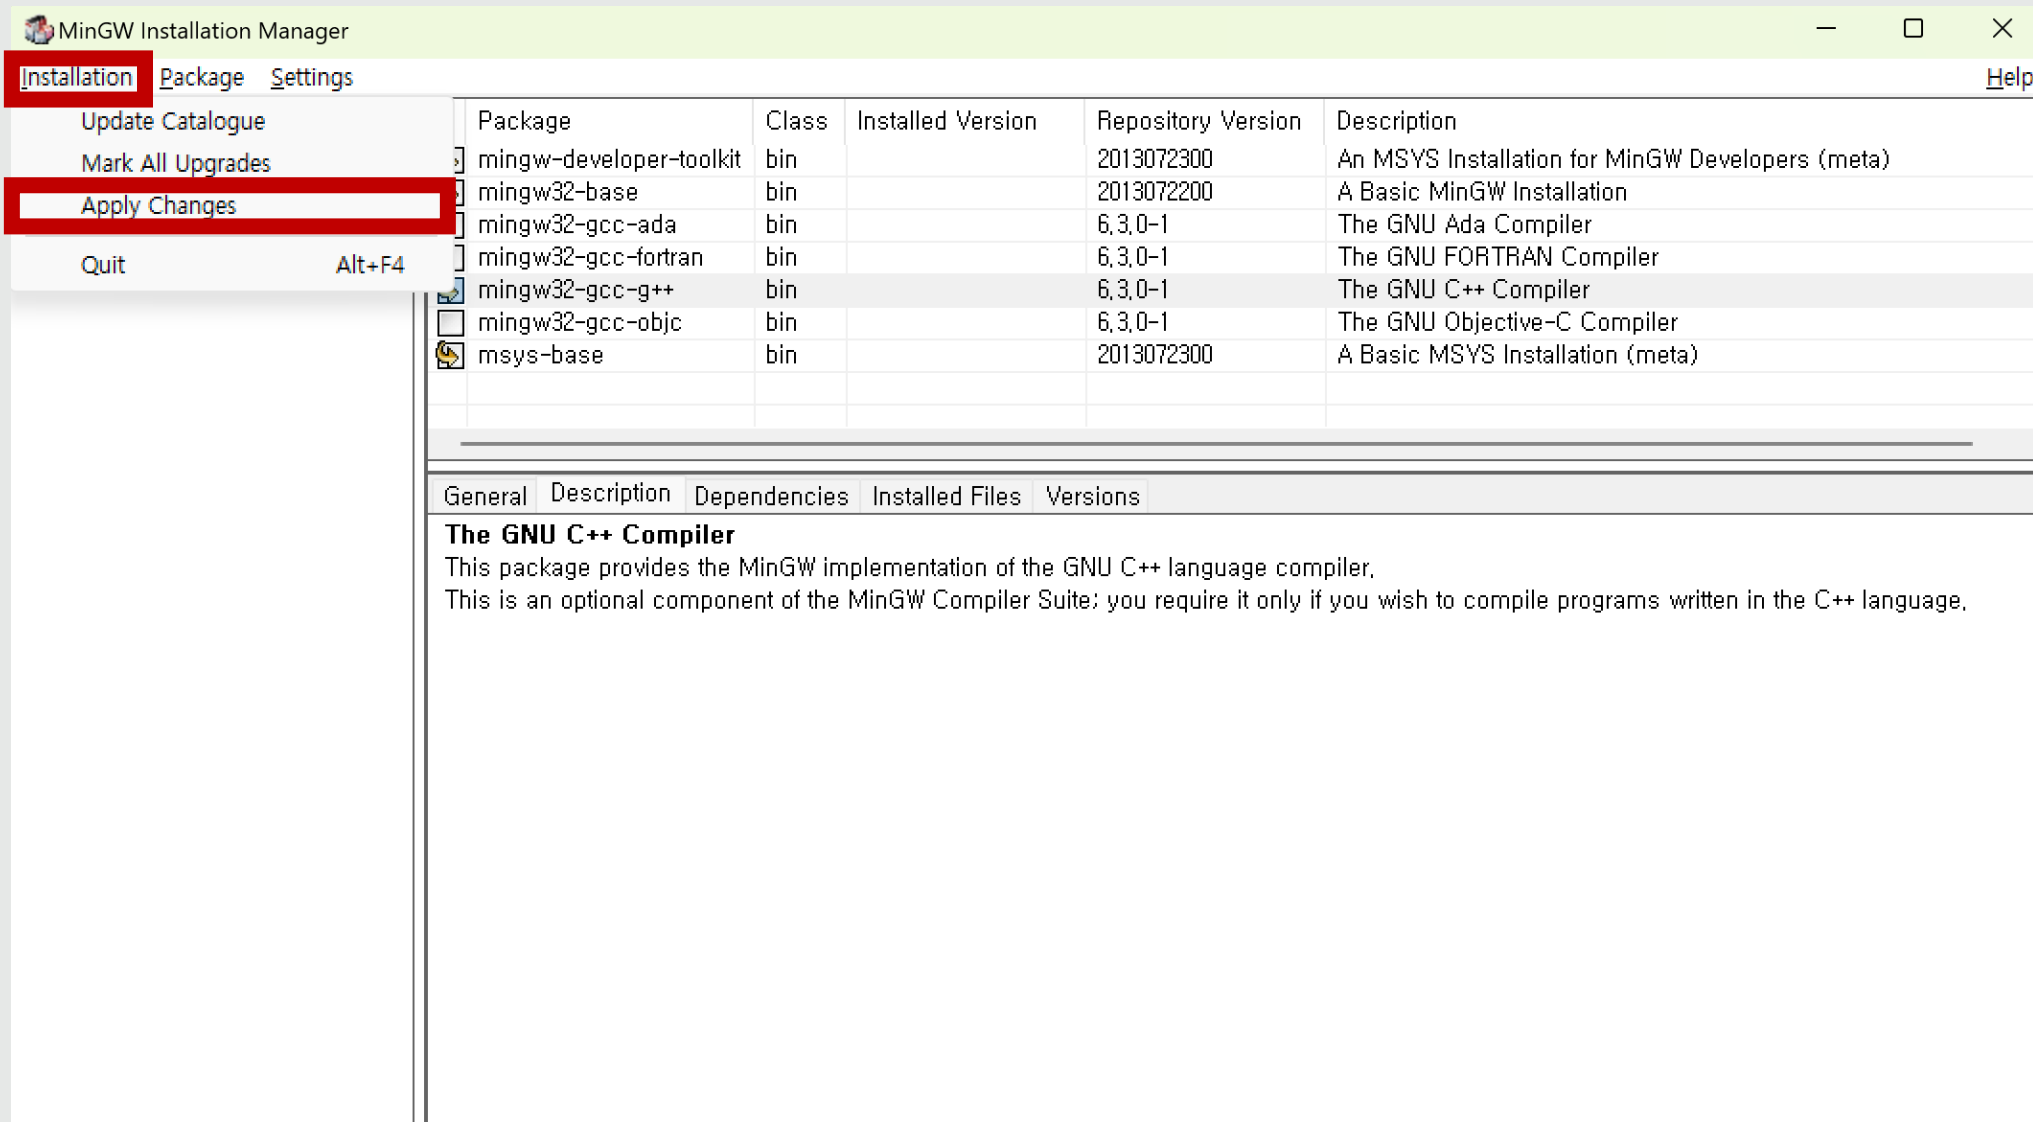

This meta package contains the components necessary to create a relatively complete MSYS installation suitable for most MinGW developers' needs. It includes the msys-base system, as well as the autotools (autoconf, automake, libtool, gettext, and libiconv) configured for use in maintaining and building native win32 (MinGW) programs. It includes m4, perl, vim, patch, cvs, guile, mktemp, bison, flex, lndir, and other useful command line tools. It also includes networking clients for ssh, rsh, telnet, and ftp protocols.

Note that, for certain esoteric reasons, some of the packages installed by this meta package are MSYS packages, and install, as expected, in the /usr directory (that is, into C:\msys\1.0, or whatever you've chosen as the "root" MSYS path). However, it also includes some MinGW packages: the autotools are technically configured for MinGW, and are installed into the /mingw directory (that is, into C:\MinGW or whatever you've chosen as the "root" MinGW path).

tasks.json 파일 작성

The screenshot shows the Visual Studio Code interface. On the left, the Explorer sidebar shows the file structure with `tasks.json` selected under the `.vscode` folder. The main editor area shows the content of `tasks.json` with the following JSON structure:

```
1 {  
2   "version": "2.0.0",  
3   "runner": "terminal",  
4   "type": "shell",  
5   "echoCommand": true,  
6   "presentation": {  
7     "reveal": "always"  
8   },  
9   "tasks": [  
10    {  
11      "label": "save and compile for C++",  
12      "command": "g++",  
13      "args": [  
14        "${file}",  
15        "-o",  
16        "${fileDirname}/${fileBasenameNoExtension}"  
17      ],  
18      "group": "build",  
19      "problemMatcher": {
```
